

STUDENT'S TESTIMONIAL

My Parent's / Guardian's Name: Sim Siew Moi Date: 15/1/09

My Name (Age): Chaw Liping 16 years old

BEFORE WORKSHOP:

I was just a normal student before I attended the Moneytree programme. I didn't know anything about financial planning. To me, the money given to me, was my allowance and I could spend it anyhow and anywhere. I didn't realise the importance of money. And when money comes into my hand, they would just disappear on stuffs that I want to buy.

AFTER WORKSHOP:

After attending the Moneytree programme, I found out that it is really a very fun and interesting organisation that teaches students about real-life financial literacy through a special and effective method. For me, I first thought that the moneytree programme, was only there to teach me money-related stuff. But after I attended the programme, I found out that I was actually able to learn more than what I thought I would there. I was quite shock when they said they are going to teach us to play shares and learn about stock market. It was also very motivating when I see many other teenagers in the same class as me. We learn many financial tips together and I manage to make quite a few friends there. We all learn and played games like trivia. Real-life examples about finances were also given and I found out many things that are happening around the world today when finances are not plan properly. I like the programmes!
